A.I.-Powered Digital Transformation Solutions for Higher Education

DigiScript

AI/ML-powered student-centric solution specifically focusing on Admissions, Registrar services, Prospect management, and student-centric processes. Integration of advanced OCR (Optical Character Recognition) technology, for accurately transferring Credit and GPA information from high schools and colleges to the Student Information System (SIS).

Online Admissions Application Portal

Student-friendly application portal enabling students to complete and submit applications quickly. Real-time integrations with the SIS systems ensure seamless data transfer.
Degree on Time

DOT empowers students to complete their chosen degrees on time while optimizing their market value and maximizing financial aid opportunities by providing personalized recommendations for courses, certifications, and credits that enhance the marketability of their degrees.

Degree Advisor Chatbot

AI-powered Chatbot which guides prospects in finding the ideal degree & campus based on their academic and campus-life interests, transcript GPA, course data, and job/market data comparisons.

Other Products

- Integrated Doc Management System
